Wiki Makes Re-entry Into Nigeria Market

Mantee corp, PTY ltd, A Southern African Marketing company which brought the WIKI cell phone monitor to Nigeria in 2006 has made a re-entry into Nigeria, this time with more exciting variety of lifestyle enhancement devices. The company will also stay and obtain a considerable portion of the market share with her WIKI compact notebook computers this time around.

These notebooks are rugged, colorfully attractive, novel, and conform to CE and other international standards of similar products of like specifications..

The CEO Mr. Tonye Irims, flanked by the company's national Sales Manager, Mr. Jide Olesin, says the company is here to storm the market with the revolutionary products, which include touch screen cell phones; dual sim, and other lifestyle enhancement devices designed and developed for convenience.

"WIKI has made great impact in other African countries, with all plans in place; we will generate high business velocity in Nigeria, as we will give consumers something like no other", he adds.

Nobel carpet launches largest showroom in Africa

Foremost manufacturer of Nobel premium brands of rugs and carpets, Lucky Fibres Plc, has launched a new ultra modern showroom in Abuja. The new showroom located at Leventis Close, behind Grand Square in the Central district of Abuja is the largest in Africa.

Speaking with journalists, brand manager, Lucky Fibres Plc, Ujwal Jain stated that the new showroom is part of the company's effort to provide a new world of buying experience in carpet and rug amongst Nigerians.

Dual SIM Phones and the Virtual Office

Telecommuting and remote offices are catching on pretty fast and dual SIM phones are helping this transition, CRM office solutions, call forwarding services, netbooks, Voip calls etc Central offices and headquarters are necessary now for physical collaboration, meetings with departments and work groups otherwise meetings and webinars can be conducted online. Stay connected to your global virtual office and private calls on two separate SIMs with 2 different numbers. Distinguish your work and business number from a social number. Having the business number for work, office and business related calls. And use the social number for acquaintances, social network contacts. With the networks neck to neck with "specials" and tariff plans, take advantage of the face-off with a dual SIM phone and choose which ever tariff or freebie is suitable for you without swapping SIM cards or managing multiple handsets. Cruise freely between cell phone networks and using the best voice plan day or night never mind the escape from exorbitant roaming charges when you travel abroad by purchasing a local SIM card and inserting in second SIM for cheap communication in foreign territory while leaving your "home" SIM card in one SIM so there is no break in communication from home and people that need to reach you while you overseas. Just in case you asking yourself "what's the big deal, I can use 2 phones anyway" Well maybe you should ask yourself what happens when you have more than 2 SIM cards, will that mean 3 or more cell phones on you?

Never Leave Your Home Country Without A Dual Sim Phone!

The procedure is pretty simple, before you leave your home country activate your roaming service on your home SIM card, now when you get to your destination country purchase a local SIM and insert in second SIM slot in your dual SIM phone and you good to go! Calls and SMS on home SIM card will come through as if you are still in your home country, you may choose to not receive the call and instead call back with a VOIP call service or reply by text message. Remember you are only charged by your cell phone network service provider when you actually receive a call, make a call or send a text message. Receiving text messages are free.

When you are back in home country you are free to use 2 different SIM cards either from the same cell phone network or different cell phone networks and enjoy competitive tariff for voice and data.

The WIKI dual SIM phone works on any GSM network anywhere in the world.
Stay connected to your office from anywhere on the globe and private calls on two separate SIMs with 2 different numbers. Distinguish your work and business number from a social number. Having the business number for work, office and business related calls. And use the social number for acquaintances, social network contacts.
